## questions being answered after final exam period is done

 You are subscribed. [Unsubscribe](#) [finalCourseQuestions](#) × [+ Add Tag](#)[Karen West](#) · in 5 minutes 

I just wrote my thank you note on the discussion forum for the course, and although I did well enough to pass with distinction (111/120), I still have a few unanswered questions at the course end. So after the deadline goes by for the final exam, (or perhaps by way with a different hypothetical question that is different than the final exam before the deadline of the final exam), I have a few questions on some questions I was able to finagle my way through and get correct on the final (Montgomery Reduction) and another I got incorrect (modulo multiplicative inverse question). Also from earlier quizzes, I got some incorrect I still do not quite understand, from week 4, the prime factoring question of 2015, and the scan chain based attack with 5 flip flops and their TC control. I think the rest of the questions on quizzes I got incorrect were previously answered on the discussion forum. I hope to clear up these last few confusions if possible before the course ends, but after the deadline of the final for the questions there, unless there is a way to do it with a different question that is similar before the final exam deadline arrives. Please let me know how to go about this. Thanks in any case for a great course in hardware security! ;-)
